The French Defence Minister picked out COMAT SME

During her visit of the French Space Agency (CNES) on September 7, 2018, French Defence Minister Florence Parly talked with COMAT's Managers Benoit Moulas and Ludovic Daudois after her speech on « espionage in space ». How to deal with this issue that also concerns SMEs?

Her watchword regarding COMAT: « Don't refrain from anything ». A most welcome command for COMAT's engineers whose imagination and disruptive technical achievements have resulted in a plasma electric propulsion engine and innovative space mechanisms.

Further discussions will take place at the Ministry in order to think and work together for the future of our Defence.
